

Breast Cancer Screening

- Assesses women 50–74 years of age who had at least one mammogram to screen for breast cancer in the past two years.

How to improve your score

- Discuss the importance of breast cancer screening and ensure your patients are up to date on their mammogram.
- Document screening for breast cancer in your medical records and be sure to include date of screening and results.
- Document medical and surgical history of breasts.
- Let patients know that screenings are covered by FEP Benefits.

Codes

■ Mammograms:
